

Amit Arya

Senior PHP Full Stack Engineer

Open to new opportunities

SUMMARY

Senior PHP Full Stack Engineer with 10+ years building production web platforms in PHP and MySQL. Strong in PHP 8.x fundamentals (OOP, namespaces, sessions, PDO prepared statements), MySQL schema design, jQuery/AJAX/Fetch API, Bootstrap 5, and REST integrations. Prevents SQL injection, XSS, and CSRF; designs with ER diagrams and API contracts before coding. Recently shipped billing features on TestRail's GBS (subscriptions, Stripe, CRM sync). Uses Cursor and Claude (Anthropic) with security review gates — architecture-first, not framework-dependent. AWS working knowledge: EC2, RDS, S3, IAM.

RECENT PROJECTS

- **Sajilo Restro** — QR-based contactless restaurant ordering (full-stack PHP / Vue)
- **Clinic OS (Lighthouse)** — therapy clinic operating system (React, Node, Postgres)
- **Ledger Flow (BFMS)** — bookkeeping firm management system

WORK EXPERIENCE

Gurock — TestRail (GBS) 2024 – 2025

PHP Full Stack Engineer (remote; concurrent with Empire)

GBS is the billing and operations platform behind TestRail's Customer Portal and Admin Panel (Idera / formerly Gurock Software).

- Owned end-to-end PHP/MySQL features for subscription, order, and license workflows.
- Integrated Stripe payments, AI Credits, and HubSpot/Zendesk APIs and webhooks.
- Debugged production CRM sync and email delivery failures; hardened data handling and edge cases.
- Applied secure coding practices — input validation, session handling, and least-privilege data access.

Empire International & Empire Sports Sep 2024 – Present

Team Lead

Australia/Nepal education consultancy; also involved in Nepal Premier League (Sudurpaschim Royals). Lead delivery, technical direction, and team practices across web platforms (role overlaps Gurock engagement).

- Lead feature delivery and code quality standards across PHP/MySQL web platforms.
- Drive AI-assisted development practices with review gates for correctness and security.

Shubhu Tech Pvt. Ltd. Aug 2022 – Feb 2024

Web Developer

US-based software company building developer tools and platform components.

- Built microservices and reusable PHP packages; designed REST API contracts across services.
- Full-stack delivery with PHP, MySQL, JavaScript, and jQuery/AJAX — independent feature ownership.
- Used Composer, Git, and Redis; wrote technical notes before implementing non-trivial features.

Davariable Innovations Dec 2019 – Jun 2022

Web Developer

Technology startup focused on scalable IT solutions; product direction and web application delivery.

- Designed MySQL schemas and shipped full-stack PHP applications; improved query performance.
- Built Bootstrap + jQuery/AJAX UIs; owned requirements-to-delivery for customer-facing tools.

Miracle Interface Oct 2014 – Sep 2019

Sr. Programmer

EDUCATION

Bachelor of Computer Application

Lovely Professional University
Phagwara, Punjab, INDIA

Higher Secondary (+2)

College of Applied Business
Tangal Durbar, Kathmandu

EXPERTISE

PROFESSIONAL

- End-to-End Feature Ownership
- ER Diagrams & API Contracts
- Technical Design Documents
- AI-Assisted Development
- Application Security

TECHNICAL

- PHP 8.x (raw PHP, OOP, PDO)
- MySQL — schema, indexing, tuning
- jQuery / AJAX / Fetch API
- Bootstrap 5, HTML5 / CSS3
- REST APIs, Stripe, webhooks
- SQLi / XSS / CSRF prevention
- Composer, PHPUnit, Redis, Git
- GitHub Actions, Nginx / Apache
- AWS (EC2, RDS, S3, IAM — working knowledge)
- Cursor, Claude (Anthropic)
- Laravel / Yii / CodeIgniter (as needed)
- Docker, Linux / Bash

CERTIFICATION

- Advance PHP/MySQL
- Laravel, AI Tools Workshop

PROJECT

- **Sajilo Restro** — QR contactless restaurant ordering
- **Clinic OS (Lighthouse)** — therapy clinic OS
- **Ledger Flow (BFMS)** — bookkeeping firm management
- POS, Ecommerce, CMS platforms

Global technology company (Japan HQ, Kathmandu branch). Deep foundation in PHP/MySQL production systems.

- 5 years building PHP applications, MySQL schemas/indexes, and jQuery/AJAX + Bootstrap UIs.
- Practiced secure coding — SQL injection prevention via prepared statements, XSS escaping, CSRF tokens.
- Deployed and maintained apps on Linux with Nginx/Apache; used Git for version control.
