Amit Arya

Senior PHP Full Stack Engineer

Open to new opportunities

SUMMARY

Senior PHP Full Stack Engineer with 10+ years building production web platforms in PHP and MySQL. Strong in PHP 8.x fundamentals (OOP, namespacing, sessions, PDO prepared statements), MySQL schema design, jQuery/AJAX/Fetch API, Bootstrap 5, and REST integrations. Prevents SQL injection, XSS, and CSRF; designs with ER diagrams and API contracts before coding. Recently shipped billing features on TestRail's GBS (subscriptions, Stripe, CRM sync). Also building hobby SaaS products (Sajilo Restro, Clinic OS). Uses Cursor and Claude (Anthropic) with security review gates — architecture-first, not framework-dependent. AWS working knowledge: EC2, RDS, S3, IAM.

RECENT PROJECTS

- Sajilo Restro** — QR-based contactless restaurant ordering (Laravel, Vue)
- Clinic OS (Lighthouse)** — therapy clinic OS: protocols, beds/queue, NFC (React, Node, Postgres)
- Ledger Flow (BFMS)** — bookkeeping firm management system
- Sudurpaschim Royals** — cricket club website (Empire / NPL)
- Tiun Tarkari** — ecommerce + Laravel POS for online grocery

WORK EXPERIENCE

TestRail (GBS)

Feb 2025 – Apr 2026

PHP Full Stack Engineer · Contract · Remote

Platform behind TestRail's Customer Portal and Admin Panel — subscriptions, orders, licensing, and internal admin workflows (PHP/CodeIgniter, MySQL).

- Built billing features: Stripe payments, AI Credits tied to subscriptions/trials.
- Integrated HubSpot and Zendesk; fixed production HubSpot sync and CRM email delivery.
- Owned PHP/MySQL subscription, order, and license workflows end-to-end.

Empire Intl / Sports
